IBRAHIM BENJULAMARD

Senior Backend Engineer | Distributed Systems | Fintech Platforms

Bangkok, Thailand
ibr.benjulamard@gmail.com
(+66)89 656 2412
http://ibrahim.benjulamard.site

Senior Software Engineer with over 10+ years of experience building high-reliability backend systems in fintech, banking, and financial market platforms. Experienced in **microservices architecture, real-time data systems, and cloud infrastructure** using .NET, Java, Kafka, and AWS. Proven track record of delivering scalable distributed systems, modernizing legacy platforms, and leading system integrations in complex enterprise environments.

Nationality : Thai

Speaking:

Thai (Native)

English (Professional working proficiency)

Bahasa Melayu (Basic)

Education

Bachelor of Engineering,

Computer Engineering,

Prince of Songkla University | 2014

Technical Skills

Language:

C#, SQL, Java, JavaScript, Go

Framework :

.Net 6/7/8, ASP NET Core, Web API, ReactJS, ExpressJS, Spring Framework

Architecture :

Microservices Architecture, Domain-Driven Design(DDD), Distributed systems

Data & Messaging:

SQL Server, MySQL, MongoDB, PostgreSQL, Apache Kafka, Redis, AWS DynamoDB

Cloud & Infrastructure

Amazon Web Service (AWS), Docker, Terraform, Linux

DevOps & Quality

Jenkins CI/CD, Ansible, XUnit, GrowthBook(Feature flag)

Experiences

Jun 2024 - Nov 2025, *Senior Software Engineer (Consultant),* Deloitte

- Led modernization of financial market data management platform, migrating legacy services to a scalable microservices architecture.
- Designed and implemented RESTful APIs for real-time market data distribution used by financial applications.
- Implemented a Kafka-based event streaming pipeline enabling reliable high-throughput data delivery
- Built resilient services using Redis caching, Polly retry policies, and containerized deployments using Docker.
- Contributed to a large-scale insurance system modernization project, integrating legacy systems with modern cloud-based services.

Tech: .Net, MongoDB, Redis, Kafka, Docker, Polly, GrowthBook(Feature flag), React, InsureMO(Insurance)

Jun 2023 - Jun 2024, *Senior Software Developer,* ATA IT

- Conducted a .NET modernization initiative migrating multiple internal systems to modern .NET platforms.
- Refactored legacy codebase to improve maintainability, performance, and long-term supportability.
- Planned and implemented CI/CD pipeline with Jenkins and Ansible, enabling automated build, testing, and deployment workflows.

Tech: *.Net, Jenkins, Ansible, SQLServer*

July 2021 - Dec 2022, *Senior .Net Developer,* LSEG (London Stock Exchange Group)

- Implemented an internal RSM and SSO Platform, centralizing authentication across multiple enterprise services and improving access control consistency for internal systems.
- Applied automated testing and load testing strategies ensuring system reliability under high concurrency.
- Assisted infrastructure automation using Terraform and AWS, enabling repeatable environment provisioning.

Tech: *.Net, Docker, Jenkins, DynamoDB, AWS, Terraform, XUnit*

Apr 2020 - July 2021, *Senior Full stack Developer,* Krungsri nimble

- Owned the marketplace module within a mobile banking application, ensuring reliability and performance for customer transaction processing services.
- Designed integrations between the mobile banking system and internal financial services.
- Managed cloud migration from on-premise infrastructure to AWS, improving scalability and operational flexibility.

Tech: *.Net, Redis, SQL Server, Ansible, Jenkins, Docker*

Dec 2017 - Apr 2020, *Backend Developer,* BRINK's Global Technology

- Developed Java backend services supporting mobile applications used for secure logistics and cash transfer operations.
- Implemented REST APIs and SQL Server stored procedures for high-reliability data processing.
- Performed load testing with JMeter to validate performance under peak operational loads.
- Supported global deployment on JBoss and production issues investigations.

Tech: *Jave EE, SQLServer, JBoss, JMeter, RESTful*

Nov 2014 - Nov 2017, Software Specialist, Freewill Solution

Responsible for both backend and frontend development of the Risk Management module, a Windows Forms application designed for stock exchange brokers to monitor, manage, and track customer trading behavior. Develop backend services using Java and implemented frontend functionality using C# .NET for enterprise trading risk management applications.

Tech: Java, .Net, SQLServer
